BAMBOO REPLACEMENT LID

COMPATIBILITY & FIT GUIDE

2-Pack Bamboo Lids with Silicone Gaskets

COMPATIBLE TOP INNER OPENING	MEASUREMENT REFERENCE
95.5–96.5 mm (3.76–3.80 in)	Inside diameter at the very top edge

1. How to Measure

Use the inside jaws of a caliper to measure straight across the INSIDE of the very top edge of the jar opening.

- Do not measure the outside rim.
- Do not measure farther down inside the neck.
- Measure in two perpendicular directions. If the opening is uneven or tapered, fit may vary.

2. Check the Fit

- **Insert gently:** The lid should seat normally without excessive force.
- **Check stability:** The lid should sit securely and not feel excessively loose.
- **Remove normally:** The lid should be removable without being stuck or requiring unusual force.

3. If the Lid Does Not Fit as Expected

- If the lid feels too tight or will not seat, stop. Do not force it.
- If the lid feels loose or unstable, do not rely on it to stay in place.
- Recheck the topmost inner diameter and opening shape. Jar capacity or brand alone does not guarantee fit.

What's Included

2 bamboo replacement lids with silicone gaskets. Jars are not included.

Care

Hand wash and dry promptly. Do not soak or place in a dishwasher.

Compatibility depends on the measured opening and its shape. | ASIN B0F79T1N24
